

ENVIRONMENTAL POLICY

Royal Palm Resort & Spa lives from an impeccable beach, crystal clear water, fresh air and an intact environment.

To minimize the impact to the environment of the inhabitants and to ensure our clients the beachfront vacation experience they expect, the management of the hotel is aware of the environmental impacts of each individual and the hotel complex. Therefore, Royal Palm Resort & Spa implements sustainability in all areas of the hotel.

We commit ourselves:

- Not only comply with the national environmental standards and laws, but implement sustainability in all our policies and procedures.
- Comply with international regulations of environmental protection.
- On one hand train our staff in aspects of environmental protection and on the other hand to sensitize and encourage both, our customers, suppliers and partners to participate actively in the protection of our environment.
- Monitor all hotel supplies and check them periodically in order to interpret the environmental impact of the hotel and to be able to define measures of environmental protection for the future.

Our main goal for next year is to achieve international awards that verify our sustainability.
