

POLICY ON THE PROTECTION AND SUPPORT OF BIODIVERSITY

At the Royal Palm Resort & Spa, we are deeply committed to protecting and supporting biodiversity. We believe it is our responsibility not only to offer exceptional experiences to our guests, but also to look after the environment. With this commitment in mind, we have implemented the following measures and policies to reduce our environmental impact and promote nature conservation.

REDUCTION OF POLLUTION:

- We implement solid waste management programmes that promote recycling and the reduction of non-biodegradable waste.
- We have installed efficient systems for the management and reuse of waste water.

PROTECTION OF NATURE:

- We respect and protect local ecosystems, ensuring that our activities do not interfere with the surrounding natural areas.

SUPPORT FOR WILDLIFE:

- We maintain green spaces and gardens within our premises that serve as a refuge for various species of flora and fauna.
- We educate our guests on the importance of biodiversity and how they can contribute to its conservation during their stay.

At the Royal Palm Resort & Spa, we understand that sustainability and environmental protection are essential to the well-being of future generations. We are committed to continuously improving our practices and working in partnership with our guests, staff and the local community to make a lasting positive impact.

We would like to thank our guests for their support in these efforts and invite them to join us in our mission to protect biodiversity.
